OBJECTIVE

Artificial Intelligence and Data Science student with hands-on experience in AI-powered applications, Generative AI, Machine Learning, web development, data analysis, and rapid product development. Proficient in Python, Java, SQL, JavaScript, REST APIs, FastAPI, LLMs, and problem-solving, with experience developing, testing, debugging, and iterating real-world applications. Familiar with AI-assisted development, API integration, UI/UX, and software development workflows. Seeking an entry-level Software Engineer or AI/ML opportunity to apply technical skills, solve practical problems, learn emerging technologies, and contribute to impactful products.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science — **Aug 2023 – Present**
Prathyusha Engineering College, Tiruvallur — **CGPA – 8.28**

Intermediate Education — **June 2021 – March 2023**
Sri Chaitanya Junior College, Tirupati — **Percentage – 85.3%**

SKILLS

- **Programming:** Python, Java, JavaScript, SQL, C
- **Web & Backend:** HTML5, CSS3, FastAPI, REST APIs
- **AI & ML:** Artificial Intelligence, Machine Learning, Generative AI, LLMs, Prompt Engineering
- **Core:** OOPs, Data Structures & Algorithms, Problem-Solving, UI/UX
- **Tools:** Git, GitHub, Visual Studio Code, Android Studio, Docker, n8n, Google AI Studio

INTERNSHIPS

Data Science Intern – Young Minds Technology Solutions Pvt. Ltd. — **Jun 2026 – Jul 2026**

- Cleaned and analyzed 15+ Kaggle datasets using preprocessing techniques including missing-value handling and normalization.
- Built 10+ visualizations using Matplotlib and Seaborn to identify trends and insights.

Web Development Intern – The Skybrisk — **Dec 2025 – Feb 2026**

- Built 5+ responsive web pages using HTML5, CSS3, and JavaScript with focus on usability.
- Used Git-based workflows and tested/debugged webpages across multiple browsers.

PROJECTS

Rise & Shine – AI-Powered Smart Alarm & Productivity App

- Built an AI-powered Android application using Lovable, Vite, Capacitor, and Android Studio.
- Designed interactive wake-up challenges including math, typing, physical activity, and goal-based challenges.
- Used Gemini, Claude, and ChatGPT for prototyping, testing, and feature development.

Agentic AI Personalized Startup Mentor

- Developing an Agentic AI application that converts startup ideas and founder profiles into personalized startup guidance.
- Built the backend workflow using FastAPI, REST APIs, and Gemini API to generate structured startup guidance.
- Designed the workflow to potentially reduce initial startup research and planning time by approximately 70–80% compared with manually searching and organizing information across multiple sources.

CERTIFICATIONS

- NPTEL Internet of Things Certification – Elite Category (71%)
- Completed Hands-on Training in Robotics and AR/VR Technologies

ACHIEVEMENTS

- Selected at college level for Smart India Hackathon based on problem-solving and project presentation.
- Participated in a 24-hour Hackathon and contributed to developing a technical solution.
