OBJECTIVE

Motivated Artificial Intelligence and Data Science student with knowledge of Python, Java, HTML5, CSS3, JavaScript, SQL, and Machine Learning. Passionate about software development and problem-solving. Seeking a Software Engineer role where I can apply my technical skills, contribute to innovative projects, and grow as a software developer.

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science — **Aug 2023 – Present**
Prathyusha Engineering College, Tiruvallur — **CGPA – 8.28**

Intermediate Education — **June 2021 – March 2023**
Sri Chaitanya Junior College, Tirupati — **Percentage – 85%**

SSC / Grade X — **June 2020 – April 2021**
Sri Sai E.M High School, Padmavati Nagar, Tirupati — **Score – 600/600**

SKILLS

- **Programming Languages & Web Technologies:** Python, Java, HTML5, CSS3, JavaScript
- **Database:** MySQL
- **D**evelopment Tools: Git, GitHub, Version Control, Visual Studio Code and Android studio
- **Core Skills:** Artificial Intelligence, Machine Learning, UI/UX Design, Software Development, Problem-Solving, Basics of Data Structures and Algorithms and Front-End Development.

INTERNSHIPS

Data Science Intern – Young Minds Technology Solutions Pvt. Ltd. — **Jun 2026 – Jul 2026**

- Cleaned and analyzed 15+ Kaggle datasets, applying preprocessing techniques (missing-value handling, normalization) prior to Exploratory Data Analysis.
- Built 10+ visualizations in Matplotlib/Seaborn to identify trends in Kaggle datasets.

Web Development Intern – The Skybrisk — **Dec 2025 – Feb 2026**

- Built 5+ responsive web pages using HTML5, CSS3, and JavaScript, tested across 3 browsers for compatibility.
- Collaborated with team members using Git-based workflows.
- Tested and debugged webpages to ensure cross-browser compatibility.

PROJECTS

AI-Driven Motivational Alarm System

- Developed an AI-powered motivational alarm application to encourage productive morning routines.
- Engineered a rule-based scheduling system triggering personalized voice prompts at user-set intervals.
- Version-controlled the full build using Git/GitHub across Android Studio and VS Code.

Cat-Dog Image Classification Web App

- Built a Flask web application to classify uploaded images as "cat" or "dog" using a [CNN built from scratch / transfer learning with a pretrained model such as ResNet18] in PyTorch.
- Stored prediction results in a [SQLite]database for record-keeping

CERTIFICATIONS

- NPTEL Internet of Things Certification – Elite Category (71%)
- Completed Hands-on Training in Robotics and AR/VR Technologies.

ACHIEVEMENTS

- Selected at college level for Smart India Hackathon based on innovative problem-solving and project presentation.
- Participated in a 24-hour Hackathon and contributed to developing an innovative technical solution.
